DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 7 and 9-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bayer WO 99/07782, with Eckel et al. 6,569,930 serving as its English translation, or Bayer WO 00/31173, with Eckel et al. 6,596,794 serving as its English translation.

4. Eckel et al. ('930) disclose polycarbonate, vinyl copolymer, fluorinated polyolefin, nanometer sized filler and an oligomeric phosphate where y can be C₂-C₁₂ cycloalkylene in claim 1. Eckel et al. teach the same compounds in claims 2, 8-10 and 15-18. All three of applicants' oligomers have a cycloalkylene connected to aromatic rings. The number of carbons are 9, 7 and 10, respectively. The description of "Y" in

Art Unit: 1714

the references encompasses applicants' claimed compounds, i.e. substituted and fused cycloalkylenes, and there are no unexpected results shown due to the different cycloalkylene. Therefore, it would have been obvious to one having ordinary skill in the art; at the time the invention was made, to select applicants' compounds from a list of equivalents.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 7 and 9-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,569,930. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the patent encompass the claims of the application.

7. Claims 7 and 9-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,596,794. Although the conflicting claims are not identical, they are not

Art Unit: 1714

patentably distinct from each other because the claims of the patent encompass the claims of the application.
